

PRESS RELEASE

Micro-dispensing worldwide with ViscoTec

Volumetric dispensing systems by preeflow with Omron at Asian trade fair

Omron is worldwide one of the leading companies for industrial automation. At the exhibition Nepcon in Thailand Omron presented a fully automated solution with a quick change robot dispensing system. Regarding this solution an eco-DUO was mounted to precisely dispense a two-component adhesive.

Omron Corporation: Established in 1933 and currently headed by President Yoshihito Yamada, Omron now has more than 37,000 employees in 36 countries, working to provide products and services to customers in a variety of fields – including industrial automation, electronic components industries and healthcare. The company has its head offices in Kyoto (Japan), Singapore (Asia & Pacific Rim), Hong Kong (China), Amsterdam (Europe) and Chicago (USA). With annual sales over \$7 billion, Omron was ranked number 521 on Industry Week's 2008 IW1000 World's Largest Manufacturers.

Micro-Dosing in perfection!

preeflow® is a brand name powered by ViscoTec Pumpen- u. Dosiertechnik GmbH. ViscoTec primarily deals in systems required for conveying, dosing, applying, filling and emptying medium to high-viscosity fluids. The headquarter of the technological market leader is in Töging (upper Bavaria, near Munich). In addition, ViscoTec has subsidiaries in the USA, in China and in Singapore and employs about 120 people worldwide. preeflow® ensures precise, purely volumetric dosing of liquids in smallest quantities and was established in 2008. preeflow® products are appreciated worldwide, last but not least because of their unique quality – Made in Germany. An international distribution network offers professional services and support all around the preeflow® dosing systems. The various fields of application include, among others, automotive, electrical and electronics industry, medical technology, aerospace, renewable energies, electrical and hybrid technology and measurement and sensor technology. The
